Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Peltz, U. S. Patent 4,876,811.

3. Peltz teaches a hand held message sign comprising a hollow main frame 14 having a first pair of longitudinal interior channels (opposite ends of slot 46) facing one another. The main frame 14 has a top opening (slot 46) and a first sign 22 having visible indicia thereon for being slidable within the first pair of longitudinal interior channels from a storage position inside of the frame (See figure 1) to an exterior position outside of the frame (figure 2), a pole 16 extending downward beneath the main frame for allowing one hand of a user to support the main frame in a raised position.

4. Claims 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilson, U. S. Patent 3,991,495.

5. With respect to claim 21, Wilson teaches a device having a hollow main frame 12 having a first pair of longitudinal interior channels (opposite ends of slot facing one another. The first channel is formed between the rear flap 24 and the face 14 along one end and the second channel is formed between the rear flap 26 and the face 14. The main frame has a top opening 54 and a bottom opening 52 and a first sign 56 having visible indicia thereon for being slidable within the first pair of channels from a storage position (figure 2) inside of the frame to an exterior position (figure 3-4) outside of the frame. Wilson also teaches holder 28 attached to the frame for allowing the sign device to be supported and held by a user and a pair of catch slots 50 in the main frame adjacent to the first pair of channels for allowing side edge tabs on the first sign to be held therein so that the first sign is attached to and extends either above or below the main frame.

6. With respect to claim 22, Wilson teaches a U-shaped front opening 44 in the main frame for allowing the first sign to slide up and down therein.

Allowable Subject Matter

7. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to claims 1, 21, and 22 have been considered but are moot in view of the new ground(s) of rejection.
